

PRIMARY SIX MIND KEEP UP SERIE II SCIENCE 2024

NAME:.....**FAMILY:**.....**MARKS:**.....

1. Name one example of non flowering seed producing plant.
.....
2. Give a reason why burning of rubbish helps to control communicable disease in the community.
.....
3. Outline the reason why some plants shade off their leaves during hot season
.....
4. How does cooking of food while covering helps to conserve wood fuel?
.....
5. How do maize plants control self-pollination?
.....
6. Which immunizable disease is commonly mistaken as HIV/AIDS because of similar signs and symptoms?
.....
7. State the reason why transpiration in plants is similar to sweating in mammals.
.....
8. Which blood component is highly affected by HIV?
.....
9. Name the group of mammals that live in water.
.....
10. Which form of energy stimulates the sense of hearing?
.....
11. Give a reason why local waragi maker may cause drought.
.....
12. State one reason why local farmers prefer rearing local breeds of cattle than exotic breed of cattle.
.....
13. Apart from immunisation, mention one other way how polio disease can be controlled in the community
.....
14. How does planting of short grass in the compound help to control soil erosion?
.....
15. State one way in which a school health club can help to control faecal diseases at school.
.....
16. Give a reason why water is not good condition necessary for germination.
.....

17. How are stretchers important in giving of first aid?

.....

18. Which form of energy is stored in wood fuel?

.....

19. Which rabbit disease causes wounds in the ear?

.....

20. Where does absorption of food take place in the digestive system of domestic fowl?

.....

21. Give a reason why snakes are grouped among cold blooded Vertebrates.

.....

22. How does frequency affect the pitch of sound?

.....

23. Give one reason why farmers sort seed before planting them.

.....

24. Outline one reason why water drains faster in sand soil than in clay soil.

.....

25. Mention one way in which accumulation of wax in the ear can lead to partial deafness.

.....

26. Why is a person with hookworms likely to suffer from anaemia?

.....

27. How does wearing of mask help to control air borne diseases?

.....

28. Name one group of birds that help to clean the environment by feeding on dead remains.

.....

29. State one functional difference between cotyledon of a wheat seed and that of soya bean

.....

30. Where does a vector which spreads river blindness lay its eggs?

.....

31. Give a reason why a splint isn't found in first aid box yet it is used to administer first aid.

.....

32. Outline the reason why pouring of oil on stagnant water help to control the spread of malaria in the community.

.....

33. Name the deficiency disease which results due to lack of protein in the body.

.....

34. How is a bird similar to a toad in terms of reproduction?

.....

35. Which immunizable disease can also be got from having sex with infected person?

.....
