20. Name the class of food that mainly boosts the body immunity.
21. Why does severe cholera lead to dehydration in a victim?
22. Give any **one** way heat is useful to a blacksmith.
23. Name **one** example of a plant with an erect stem.
24. Mention the importance of fish in the control of malaria.
25. Which type of accident is managed through the use of splints?
26. What are root tubers?
27. How is a rabbit hutch made in order to allow free air circulation?
28. Why are vacuum flasks commonly used in urban areas?
29. Which method of separating mixtures enables preparation of fruit juice at home.
30. State **one** similarity between rusting and burning.

The diagram below shows a type of fence. Study and use it to answer questions 31 and 32.

31. Name the type of fence drawn above.

32. State **one** disadvantage of such a fence on a livestock farm.

33. Write **one** use of minerals as resources.

34. Why are rat fleas a threat to human health?

35. Name any **one** farm tool used on a goat farm to carry out closed castration.

36. What can a mother do at home to control worm infestation among children?

37. Why does exhaled air contain less oxygen?

38. Give **one** example of a food taboo.

Below is a diagram showing a way of preparing food. Study and use it to answer questions 39 and 40.

39. How is heat transmitted through the saucepan able to reach the food being cooked?

40. State the importance of banana leaves used to cover food while cooking.

SECTION B : 60 MARKS

Questions 41 to 55 carry four marks each.

41. (a) What is Primary Health Care?

- (b) Write any **two** principles of Primary Health Care.
 (i) _____
 (ii) _____
- (c) Which element of Primary Health Care enables a P.6 child to administer First aid to a sister with a scald?

42. (a) Give any **one** characteristic of hypogeal germination.

- (b) Why does the root system develop first during germination?

- (c) Of what use are the following conditions during germination?
 (i) warmth _____
 (ii) oxygen _____
43. (a) Mention any **two** examples of foodstuffs that help in strengthening bones in the body.
 (i) _____
 (ii) _____
- (b) What is the effect of each of the following activities to human teeth?
 (i) opening bottles of soda with teeth _____
 (ii) eating plenty of sweets _____
44. The diagram below shows the respiratory system. Study and use it to answer the questions that follow.

- (a) Name the part marked with letter D.

- (b) How is part marked with letter R suited to its function?

- (c) What happens to part marked with letter M during inhalation?

- (d) Give **one** way the system drawn above can be put in a proper working order.

45. (a) In which **two** ways can animals be used as resources?

(i) _____

(ii) _____

(b) Mention any **two** ways animals can be conserved as resources.

(i) _____

(ii) _____

46. (a) Give **two** causes of malnutrition in infants.

(i) _____

(ii) _____

(b) How can a mother identify that her child is malnourished?

(i) _____

(ii) _____

47. (a) Name the form of energy that enables the human eyes to perform their function.

(b) State the danger of looking directly at the sun to our eyes.

(c) Write **two** items that can be used to keep our eyes clean.

(i) _____

(ii) _____

48. The diagram below shows a person burning a piece of paper. Study and use it to answer the questions that follow.

(a) Which type of change is shown in the diagram above?

(b) Give **one** reason for your answer in (a) above.

(c) What name is given to the substance labelled with letter R?

(d) How is the type of change drawn above useful in our daily life?

P.6 INTEGRATED SCIENCE BEGINNING OF TERM III EXAMINATIONS 2024

IGNITE CRITICAL THINKING AND EXPERIENCE. ACTUAL LEARNING WITH THE ACTIVITY BOOKS, SEMAS, TEACHER'S GUIDES & PUPIL'S COMPANIONS.

49. Study the animals given below to answer the questions that follow.

gecko	fish	turkey	squirrel
-------	------	--------	----------

(a) Give the similarity between a fish and a turkey in terms of reproduction.

(b) Name the general body feature that makes the above animals be grouped together.

(c) Which group of vertebrates is missing in the list above?

(d) How useful is a gecko in a house?

50. (a) Give **two** examples of breeds of cattle with a triangular body formation.

(i)

(ii)

(b) Write any **two** products got from milk.

(i)

(ii)

51. (a) State the structural difference between a seed and a fruit.

(b) Give **two** functions of fruits to a plant.

(i)

(ii)

(c) Mention any **one** way fruits can be dispersed from one place to another.

52. (a) What is a colony as used in bee keeping?

(b) Write any **two** factors that may attract bees to occupy a new hive.

(i)

(ii)

(c) Name the type of bees that scouts and looks for a new beehive.

53. The diagram below shows two methods of preserving food. Study and use them to answer the questions that follow.

(a) Name the methods of food preservation drawn above.

(i) **C** _____

(ii) **B** _____

(b) How are the methods drawn above similar in the way they preserve food?

(c) State **one** disadvantage of using method marked **B** to preserve food.

54. Match the vaccines given in list A to the body sites of administration in list B.

List A

BCG vaccine
Hep B vaccine
Polio vaccine
Measles vaccine

List B

- right upper thigh
- mouth
- right upper arm
- left upper arm
- left upper thigh

- (i) BCG vaccine : _____
(ii) Hep B vaccine : _____
(iii) Polio vaccine : _____
(iv) Measles vaccine : _____

55. (a) Name the type of germ that causes the communicable diseases below;

(i) HIV/AIDS _____
(ii) cholera _____

(b) Mention **one** way the spread of each of the above communicable diseases can be controlled:

(i) HIV/AIDS _____
(ii) cholera _____
